

MATH-O! Vocabulary Review Game

Teacher's Directions:

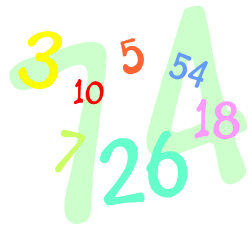

This is a math vocabulary review game. When it's time to review important math terminology, use this whole class review game! It's just like BINGO.

Post 25 math terms and have each student write them on their grid once. If you don't have 25 vocabulary terms, just have students draw math symbols (+, -, ×, ÷) as a "free space."

To Play:

1. Randomly pick a term and define it without naming it.
2. Have each student find the matching term on his/her grid and put a mark/chip on it.
3. When a student gets five in a row, he/she calls out, "MATH-O!"
4. If he/she correctly identified the terms you defined, give that student a small reward, have students clear their boards, and play again.
